HACKMEETUP ØRESUND

April 29

**Open Source
meetup in
Malmö, every
even-week
Tuesday.**

**If you are a coder,
programmer, tin-
kerer, hacker, de-
veloper, software
engineer, this is for
you.**

Create stuff, learn, and socialize. Everyone brings their own projects, like “I need to get started using Git” or “There’s this memory leak, and I need to use Valgrind to fix it”, or “Those PHP loops could be iterators, I need to do that.”

So there is a room, a can-do atmosphere, some people to meet, and time set aside for fiddling with Open Source stuff.

Location: Hypergene offices at Västergatan 23, in the conference room.
